

ABSTRACT

A facsimile apparatus in which a large display apparatus can be mounted while realizing miniaturization of an apparatus main body, an operation panel having excellent operability is realized, excellent inserting performance of documents and recording paper can be assured, compatibility between simple operability and multifunctional operability can be realized, is provided. The apparatus has: an operation panel 71 arranged in an upper front portion of the apparatus main body; a display unit 14 which is closably arranged to the operation panel 71, located in an upper rear position of the operation panel upon opening, and overlaid onto the operation panel upon closing; and a document inserting port 44 and a recording paper inserting port 29 arranged behind the operation panel in the upper portion of the apparatus main body and behind the display unit 14 upon opening.
